

## A bibliography of plant teratology - 'science of wonders'

Pierre Binggeli

Teratology - an old-fashioned botanical topic of interest that had its heyday up to WW2. This bibliography is far from being exhaustive and reflects the compiler's interest in *Acer pseudoplatanus* and fasciations. Nevertheless, it provides an array of bibliographical references often from rather obscure journals.

Albertsen, M.C., Curry, T.M., Palmer, R.G. & Lamotte, C.E. (1983) Genetics and comparative growth morphology of fasciation in soybeans (*Glycine max* (L.) Merr). Bot. Gaz. 144, 263-275.

Arisz, W.H. (1927) On the heredity of teratological characters. Double flowered mutants in tobacco. Genetica 9, 39-100.
